

Atlas of Maine

Inland Waterfowl and Wading Bird Habitat

By: Jay Harvey
Colby College

Environmental Studies Program

This map shows the habitat of inland waterfowl and wading birds in the state of Maine determined to be high or moderate rated Significant Wildlife Habitats by Maine's Natural Resources Protection Act. These habitats may only be tampered with after permit and only if damage is insignificant or compensation for destruction is provided. Also shown is habitat within conserved land, protected from any damage. The complete wetlands and freshwater of Maine are also shown, as designated by the U.S. Fish and Wildlife Service.

All data were retrieved from the Maine Office of GIS.
