This Newspaper is brought to you for free and open access by the Waterville Materials at Digital Commons @ Colby. It has been accepted for inclusion in The Eastern Mail (Waterville, Maine) by an authorized administrator of Digital Commons @ Colby.

and below them are deeps of depravity, so shocking and horrible that their character cannot even be hinted. There are some dark shadows in human nature which we naturally shrink from penetrating, and I made no attempt to collect information of this kind; but there were enough in the things which I could not avoid seeing and hearing—which are bro't almost daily to the notice of every foreign resident—to inspire me with a powerful aversion to the Chinese race. Their touch is pollution, and harsh as the opinion may seem, justice to our own race demands that they should not be allowed to settle on our soil.

The Eastern Mail. WATERVILLE . . . JAN. 28, 1858.

AGENTS FOR THE MAIL. V. P. PALMER, American Newspaper Agent, is Agent for this paper and is authorized to take advertisements and subscriptions at the same rates as required by us. His office are at Scollay's Building, Court street, Boston; Tribune Building, New York; N. W. corner Third and Chestnut sts., Philadelphia; S. W. corner North and Fayette streets, Baltimore.

WOOD. These who propose to bring us wood are requested not to delay, as the sleighing may compel them to disappoint us when it is too late to supply ourselves elsewhere.

Farmer's Club. The meeting at Mr. Dyer's on Friday evening, was not only well attended but highly interesting in its discussion. The value of muck, with the various modes of mixing and using it, called out many valuable facts and principles; some of each going strongly to show that muck may profitably be used alone, on some soils, as a top dressing or mulch for mowing lands.

Dr. Porter explained some of the chemical principles that should govern the composition of different kinds of fertilizers. Gypsum should be spread upon the stable floor, and mixed freely with the manure in the cellar or heap. Leached ashes or slaked lime were useful components of the mulch heap, when designed either for immediate use or to remain piled. Unslaked lime should in no case be added to muck or stable manure.

The value of sheep, as farm stock, was "talked over" with much interest. Mr. I. R. Doolittle has fattened sheep in the winter, on hay and grain, and sold towards spring, at rate that gave a handsome profit, and better return for corn than to sell at market price. His statement was a reliable one, from a man who figures carefully; and the result showed that the same thing can be done again. The relative expense of keeping sheep and cows was fixed, by general estimate of those present, as ten sheep to one cow.

The meeting tomorrow evening will be at the house of Mr. Doolittle, on the Kendall's Mills road. Let it be remembered that all persons, whether farmers or not, are eligible to membership, without money and without price, and are cordially invited to come in.

Good.—We never joked a fool but once. He knew just enough to shovel manure, and we set him at it. After a short absence, we approached him unobserved, and found him leaning upon his shovel watching a hungry musketeer that was taking a lunch from his arm. "Work away," we said sharply, "work away! musketeer wont hurt a fool." He made a sudden slap at the musketeer, and looking up with a broad and foolish grin in our face, he said slowly, but as we thought very emphatically, "Ain't-you glad-en't?" He missed the musketeer, but he hit us—didn't he?

CLERICAL HIT.—Our friend, Elder Dash is a Baptist, and his friend Elder Blank, is a Methodist. They worship together and pray together, and sometimes preach for each other, but their different views prevent their communing together. Elder Blank thinks this is wrong, but Elder Dash believes it right—and both are honest and sincere, and each believes the other to be so. The other day Elder Blank rung the door bell of Elder Dash, and Elder Dash opened the door. "Can I come in?" said Elder Blank, with a smile and a sly wink that pointed directly at "close communion." "Certainly," answered Elder Dash, very kindly, "certainly, if you will walk in at the door; but I can't permit you to break in at the window."

Among the pleasant items in the report of the Superintendent of the State Reform School, is the presentation by ladies and gentlemen of Portland, of a Christmas tree, the branches of which bore a present for each of the 250 boys. The woman who originated the idea—for it must have been a woman—must have been one of those poets call angels.

WEEKLY GAZETTE.—This is the title of a paper just started at Biddeford by Marcus Watson. It is not a large sheet, but is handsomely printed and well filled. We "ex." with pleasure.

While we editors, away back in the country are luxuriating upon the fat of the land, we cannot help sympathizing with our brothers of the Eastern Mail, Biddeford Union, and Thomaston Journal, who are compelled to live on Hake, Haddock, and saw-dust puddings. Notwithstanding they are all first rate fellows, yet it takes all three of them to cast a respectable shadow.—Clarton.

While our friend of the Clarion fills his chair with the perfect shadow of an editor, without any help from abroad!

GREAT FUN, the boys and girls are having in sliding down hill and skating, these beautiful moonlight evenings. Go it, boys and girls!—and if some of you can coax your mothers to take a part in the sport, it will do them good. They are growing old too fast; and the wear and tear of your sport costs them much patching and darning.

THE WEATHER.—Yesterday at noon the thermometer stood 50 degrees above zero. For two days previous it had been thawing, and raining a little; and now the sleighing is seriously threatened, though still tolerable. It is a question whether the warm weather may not prove an injury to some kinds of fruit.

OUR TABLE.

NORTHERN TRAVEL: Summer and Winter Pictures of Sweden, Denmark and Lapland, by Bayard Taylor. New York: G. P. Putnam.

THE ATLANTIC MONTHLY.—The February number is out, and is for sale by C. K. Mathews, who has handed us a copy. Not having had time to read a single article, we can do no more at present than to give the table of contents:—

The Great Failure, The Busts of Goethe and Schiller, The Librarian's Story, Daylight and Moonlight, Something about Pictures, Cretins and Idiots, Amour de Voyage, My Aquarium, The Queen of the Red Cheese, Day-Break, Tea, The Old Burying Ground, The Autocrat of the Breakfast Table, Breranger, A Tiffin of Paragraphs, The Relief of Lucknow, New England Ministers, A Brief View of the Kansas Question, A Sunset, Art, and Literary Notices.

THE NATIONAL MAGAZINE.—A most excellent number is that for February. The illustrated articles are:—Jerrel Putnam, the first of a series of papers on Revolutionary Heroes; The Valley of the Genesee, A Royal Galaxy, and Coleridge's Rime of the Ancient Mariner. Without enumerating the titles of the remaining articles we can testify to their purity and excellence, and with the fullest confidence recommend the National to all who desire a magazine for the family. Published by Carlton & Porter New York, at \$2 a year.

Mrs. STEPHENS'S ILLUSTRATED NEW MONTHLY.—Having had the fortune to miss the first number of the new year, we feared we should see no more of this elegant monthly, but the arrival of the February number encourages us to hope that the omission was accidental and that we shall hereafter receive it regularly. This work is now enlarged to about 70 pages for each number, and is offered at \$2 a year, making it one of the cheapest, as it is one of the most elegant, periodicals in the country. The number before us is well fitted and handsomely ornamented, and the Ladies' Treasury, a new department, cannot fail to find favor with the fair portion of its patrons. Mrs. Stephens's pen has been busy in helping to fill its broad and handsome pages, and her tact and good taste are abundantly manifested in the selections. Published by Edward Stephens, 133 Nassau st., New York, at \$2 a year, with liberal discount to clubs.

Board of Agriculture. This body is now in session at Augusta, having convened on the 20th. We are glad to find a detailed journal of their proceedings in the papers. The board consists of the following members:

- S. F. Parley, Naples, State Ag. Society.
Robt. Martin, Danville, Andros. Co. Ag. Society.
J. F. Anderson, S. Windham Cum. Co. Ag. Society.
D. A. Fairbanks, Augusta, Maine Pomological and Horticultural Society.
Joseph Avery, Jefferson, Lin. Co. Ag. Society.
Wm. R. Flint, Anson, West Somerset Ag.
Nath. T. True, Bethel, Oxford Ag.
Hiram Russ, Farmington, Franklin Ag.
Seward Dill, Phillips, N. Franklin Ag.
S. L. Goodale, Saco, York Co. Ag.
Francis Fuller, Winthrop, Ken. Co. Ag.
Daniel Lancaster, Farmingdale, S. Ken. Ag. Society.
Francis L. Rice, Denmark, West Oxford Society.
Hiram Stevens, Fort Fairfield, N. Aroostook Agricultural Society.
Enoch W. Hoyt, Letter D.
Albert Noyes, Bangor, Bangor Hort. Society.
John Thissell, Corinth, W. Penobscot Ag. Society.
William E. Drummond, Winslow, N. Kennebec Agricultural Society.
Wm. M. Palmer, Palmyra, E. Somerset Agricultural Society.
Hugh Porter, Pembroke, Washington Co. Agricultural Society.
Elisha L. Hammond, Atkinson, Piscataquis Co. Agricultural Society.
John R. Russell, Norridgewock, Somerset Co. Agricultural Society.

The Board chose Robert Martin, President; Samuel F. Parley, Vice President; S. L. Goodale, Secretary; L. T. Boothby, of Waterville, Messenger.

The Board has a standing committee to report questions for discussion. The first question proposed was, "What have been the practical results of the operations of the Society which you represent, and what suggestions can you give for improvement?"

The President stated that his was a young county, and in somewhat of a rude state of agriculture, and many were disposed to follow the mode of their fathers; but not all. The opinion was generally expressed, that at the last Fair the young stock was worth double to what it was five years before, and this was mainly to be attributed to the influence of the Society. In crops there is an equal improvement.

In his town it was difficult at first to get seventeen men to join the Society. Last year they got sixty-nine, and they turned out a handsome team. The Society has a lot and a handsome building, and is in a fair way of paying for them.

Mr. Noyes, of Bangor, said that the Bangor Horticultural Society had been of great service in awakening an interest in fruit culture. He commenced fruit raising, and in common with some of his neighbors, succeeded in raising fine plums in large quantities. There were two hard winters, which greatly injured the trees and destroyed many of them. In the smaller fruits, many succeeded very well. He has never been troubled with the mildew upon his gooseberries.

Mr. Anderson said that the suggestion which he would make is, that greater attention should be paid to the raising of stock.

Mr. Parley remarked that when he first became a member of his Society it was poor, and the exhibitions were poor. Now the Society has rallied, and is in good health, and has a reserve fund. Among the improvements going on in the country is that of underdraining. There have been many lots underdrained last year. The existence of Society has kept alive an interest in fruit growing, underdraining, &c. Less has been done in stock raising than should have been. It sometimes requires much labor to keep up an Agricultural Society, and this labor sometimes leads to great discouragements; but for his part, he should be unwilling to live in a country where there was no such Society.

Mr. Dill of Phillips, remarked that the operations of the Society he represented, had been

highly favorable, and resulted not only in the improvement of agriculture but also in the improvement of the people. Great benefit had resulted from the use of leached ashes composted with muck.

Mr. Drummond of Kennebec, said that the N. Ken. Society had purchased and inclosed a handsome show ground, and was in a prosperous condition, and improvements were made in all directions.

Dr. True of Oxford, remarked that in migrating with their shows from town to town, their numbers were few, and its operations feeble. Twelve acres of land were at length secured near Norway village, and the same inclosed for the use of the society. Since that operation, all the departments of the show increased in interest; the society has flourished in numbers and influence. There has been a marked improvement in the quality of stock, also in the orchards and the culture of the smaller fruits. Also in the number and excellence of barn cellars which are now becoming common with all good farmers in our county.

Mr. Rice of Oxford, said that the society he represented was small, but that through its operations he believed that the quantity and quality of hay had been increased fifty per cent. Mr. Thissell of Penobscot, stated that the Society he represented had held only three annual fairs, and some of them had been highly satisfactory, particularly in the department of stock. A quickened feeling is apparent among farmers in the fourteen towns which compose the territorial limits of the Society.

Mr. Lancaster of Kennebec, said the South Kennebec Society was organized for the purpose of interesting the people in the southern portion of the County. The shows have been well attended, and the general improvement in agriculture, in stock raising, horses, butter, root crops and vegetables, and other departments, has been marked, and this improvement is going on successfully. Our premiums paid last year, amounted to about \$600.

Mr. Flint of Somerset, remarked that he represented the old Society in his County. The State has at several times, in various ways, shown liberality towards the farming interest, and it is in part, at least, through this liberality of the State that a new incitement to improvement has been furnished not only to individual farmers, but also to the several Societies. The County is making great improvements in the quality of its stock and sheep, and a new and better interest is excited upon the farming community by means of the aid of the State and the existence of Agricultural Societies. The growing of sheep, some years since, was much depressed, but the quality of the wool is improved; and the quantity of flocks has been kept up in Somerset county. Sheep raising is looked upon with favor, and some farmers say that they would prefer to let a portion of sheep into their pastures without charge than not to have them there. Sheep he regards as more profitable, even at present prices, than that of any other stock. He would not farm it without sheep, and no farm should be deemed as fully stocked without sheep. The cost of keeping is about \$1.50 a year. The wool will pay that or more, and the increase may be regarded as profit.

Mr. Fuller of Kennebec, remarked that the Kennebec Society was organized in 1832, and the practical result is to be seen in all the other Societies. At its last Fair there were six hundred oxen, and the greatest improvement is in stock. The most improvement has been made in the Durham breed. The Society he thinks has had a highly favorable influence every way, and all the enterprises for the improvement of farming are surely and clearly producing a good effect.

A WALLED LAKE IN IOWA.—A correspondent of the Cincinnati Gazette gives the following description of a walled lake in Iowa, which must have been built hundreds, and probably thousands of years since:

"The lake lies in the midst of a vast plain—the rich, gently undulating prairie extending for many miles in every direction. The lake covers an area of about 1900 acres. The water is clear and cold, with a hard, sandy bottom, from two to twenty-five feet deep. There is a strip of timber about half way round it; probably ten rods wide, being the only timber in many miles. There is a wall of heavy stone all around it.

It is no accidental matter. It has been built with human hands. In some places the land is higher than the lake, in which case the wall only amounts to something like a rip-rap protection. This, I believe, is what engineers call it. But in other places the water is higher in the lake, than the prairie outside of the wall. The wall in some places is ten feet high; it is 13 feet wide at the base, sloping up both sides to 5 feet wide at the top. The wall is built entirely of boulders, from three tons in size down to fifty pounds. They are all what are called lost rock. I am no geologist, and consequently can give no learned description of them. They are not, however, natives 'to the manor born.' Nor has the wall been made by the washing away of the earth and leaving the rocks. There is no native rock in this region. Besides, this is a continuous wall, two miles of which, at least, is higher than the land. The top of the wall is level, while the land is undulating—so the wall is in some places two feet and in others ten feet high. These rocks, many of them at least, must have been brought a long distance—probably five or ten miles. In Wright county the best rocks are scattered pretty freely; but as you approach this lake they disappear—showing that they have been gathered by some agency—when, or by whom, history will never unfold. Some of the largest oaks in the grove are growing up through the wall, pushing the rocks in, in some cases outside, in others accommodating their shape to the rocks. The lake abounds with excellent fish. The land in that township yet belongs to the government."

A CURIOUS METHOD OF WARMING WATER FOR CATTLE.—Mr. Peter Malbon, Jr., of this town, has devised a very curious and ingenious apparatus to warm the water for his cattle, as well as to prevent the ice from collecting in the tub. It consist of a small cast-iron chest, or box, about twelve inches square, made water tight, fixed in the fire-place in such a manner that one side of it forms so much of the fire-place, and is exposed to the heat of the fire. The water of the aqueduct in its course from the fountain to the yard, is made to pass into this box at one end and thus becoming heated, passes out at the other end, and continues to the yard, which is across the road, and about six rods from the house. Mr. Malbon, previous to adopting this plan, had had a good deal of trouble with the ice forming in his tub, but has very little trouble of that kind now. He says that his cattle drink much more than they would if the water was cold, and he believes it to be more healthy for them. The calves enjoy it so much, that when let out to drink they will fight for the warm end of the tub.

Don't be ashamed, my good lad, if you have a patch on your elbow. It is so many of us.

It speaks well of your industrious mother. For our part, we would not see a dozen patches on your jacket that bear one profane or vulgar word escape your lips. No good boy will shun you because you cannot dress as well as your companions, and if a bad boy sometimes laughs at your appearance, say nothing, my good lad, but walk on. We know many a rich and good man who was once as poor as you. Fear God, my boy, and if you are poor, but honest, you will be respected—a great deal more than if you were the son of a rich man, and were addicted to bad habits.

Later from Europe. By the Europa, at New York Jan. 24. we have the following intelligence:—

INDIA.—The semi-monthly mail from India, arrived at Suez on the first of January, with later dates from Calcutta and Bombay.

Gen. Havelock died on the 25th of November of dysentery; brought on by exposure and anxiety. On the 7th of November an engagement took place near Cawpore, between Gen. Windham's division and the Gualior mutineers, in which the British troops were repulsed with the total loss of the tents of three regiments, 3,000 in number, which were burnt by the English. The 6th regiment is reported to have been nearly cut up in the encounter. The Gualior mutineers numbered more than 8,000 men, completely organized and equipped.

Sir Colin Campbell hearing of the disaster, quitted Lucknow for Cawpore. On the 7th of December he came up with the Gualior mutineers, and totally defeated them, capturing 16 guns, 24 carriages, and an immense quantity of ammunition, stores, &c., and the whole of their baggage. The British loss in this action was insignificant, only one officer being killed.

All the women and children, sick, &c., from Lucknow, had arrived in safety at Allahabad. The official report of the defence of Lucknow is published, and shows that the privation endured by the heroic garrison, and particularly by the ladies, was fearful.

Troop ships continue to arrive rapidly at Calcutta, and among them the celebrated American clipper ship Lightning had arrived out in a passage of 87 days from the Downs.

GREAT BRITAIN.—Operations were resumed upon the Levianth on the 5th inst., with success, the vessel moved several feet. The proceedings were continued daily up to the departure of the Europa, the progress each day amounting to eight or ten feet. The evening before the Europa sailed, the ship had only sixty-four feet more to be moved.

The returns of employment in the cotton mills of Manchester show a gratifying improvement, the number of hands working full time being largely on the increase.

The Daily News says that Lord Palmerston's forthcoming India bill will transfer the direct management of the political affairs of India to a Cabinet Minister, who it is understood shall be a Peer, and in whom all patronage with one exception is to be vested.

This member of the Cabinet is to be a president of a council of six, to whom simply consultative functions are to be trusted.

The European portion of the Indian army is to be greatly augmented, and all regulations regarding it are to emanate from the horse guards.

FRANCE.—Mlle Rachel, the great tragedienne, died July 3d at her estate at Cannes. Her last professional performance were those which took place in the United States. Great increase of confidence in commercial circles in Paris is reported.

SPAIN.—The Espans of Madrid, in the course of a long article on the President Buchanan message, expresses the opinion that the Spanish government will continue firm in its refusal to give satisfaction to the United States in the affair of the Dorado, since no insult has been committed, and that it will energetically reject the insulting proposition relative to Cuba.

AUSTRIA.—Field Marshal Radetzky is dead. The event took place on the 5th of January, the immediate cause being paralysis of the lungs, after an illness of a week. The Marshal was in the 92d year of his age.

TURKEY.—Redschid Pasha, Grand Vicer, is dead after an illness of only three days.—His disease was apoplexy.

The steamer Adelaide with the last detachment of 500 marines on board passed on from Singapore on the 2d of December, and an attack on Canton was expected to take place on her arrival.

The Paris correspondent of the London Times is positively informed that the French Ambassador to the court of Peking, has arranged that after the squadrons shall have taken position before Canton, a final summons shall be addressed to the Chinese government. The accomplishment of this formality was to commence on the 16th of November.

A despatch from Paris, in the Independence Belge, asserts that instructions have been sent to the French Admiral to prevent the French troops in China from acting in concert with the English, and that the 500 men recently sent out are in reality intended for a demonstration against Cochin China. It is also said that Spain will certainly take part in this expedition.

News Over the Wire.

FROM WASHINGTON.—Washington, Jan. 21.—The 287,000 investigating Committee had a protracted session to-day. They dispatched the Sergeant-at-Arms this evening to Boston to subpoena Mr. Stone and Wolcott.

The British Post Office has made complaints that large numbers of newspapers containing writing are discovered in mails received from the United States, and according the request made to our Post Office Department, the latter has directed the attention of Post Masters throughout the country to the necessity of enforcing the laws and regulations upon that subject, and enjoins them to protect the postal revenue from such illegal practices by exercising great care and diligence in future. The British Post Office has also been requested to return to this country all newspapers etc. illegally forwarded from the United States at printed rates, with the view to prosecute the senders by the penalty of \$5 for each offense.

Lieut. Gen. Scott, although not long since opposed to a movement from the Pacific side against the Mormons, is now anxious to organize a force in that quarter. He has not, however, received orders to do so.

THE FREE STATE VICTORY IN KANSAS CONFIRMED.—St. Louis Jan. 21.—The Free State party have made a clean sweep and carried everything in Kansas. The report of last night was given on the authority of correspondents; but that of to-night on the official statement of the officers mentioned in the above dispatch. The majority against the Constitution should read 10,225.

FROM WASHINGTON.—Washington Jan. 22.—[Herald correspondence.]—It is confidently stated in the diplomatic circles here that war between Mexico and Spain is inevitable. The latter advises from Mr. Dodge, our minister to Spain, state that it is generally received opinion at Madrid that Spain will shortly make a demonstration on Mexico, England and France to the contrary notwithstanding, and that active preparations to that end are now in progress. Intimations of Santa Anna's complicity in the contemplated invasion are also mooted. The government has sent stringent orders to the Captain General of Cuba to have the Spanish naval forces in America put at once in the highest state of efficiency; on the other hand, letters received here by the last mail from Mexico a day or two since say that a negative reply to Spanish preliminary propositions has been sent to General Almonte, the Mexican minister to England, and to Senor Laffruga, and that they are instructed by the Mexican government not to recede in a single point from the just demands that Mexico has made.

THE MORMON WAR—PACIFIC RAILROAD.—Washington, Jan. 22.—(Tribune correspondence.)—The California combination for carrying on the Mormon war from that side of the Mountains, has effected its object. Gen. Scott will start for California next week, with full powers from government to organize in that State an army for the invasion of Utah, if the latest advices from Salt Lake city, which he shall receive in California, are such as to warrant the prosecution of hostilities. In that case he will employ the regulars now on the Pacific side, and will also call upon the Governor of California for volunteers. He expects to reach Salt Lake in June, simultaneously with Col. Johnston. It is part of his plan of operations to conduct the army up the Colorado river, which is, believed to be, navigable for 300 miles above its junction with the Gila, and in the exact direction of Utah.

The Southern route for the Pacific Railroad has been voted down in the Senate Committee by the casting vote of Mr. Douglas.

Washington Jan. 23.—The Senate Committee on Foreign Relations agreed to-day upon a report to be presented on Monday sustaining generally the President's Central American message, believing with him that Commodore Paulding went beyond his legitimate limits in arresting the filibusters on Nicaraguan soil, and recommending an amendment of the neutrality laws so as to hold as prisoners for trial all offenders captured in the prosecution of their hostile plans against nations with whom we are at peace.

[Herald correspondent.]—Both Mr. Calhoun, with the Lecompton Constitution of Kansas, and Mr. Stanton, with the proceedings of the legislature in opposition to that Constitution, are expected this evening or tomorrow. There will be an exciting time but the President is firm for the Lecompton Constitution as the legally expressed opinion of the people.

It is estimated that by the end of next week Treasury notes to the amount of \$3,000,000 of all denominations will have been issued.

WHAT WASHINGTON LETTER-WRITERS SAY.—New York, Jan. 25.—(Correspondence of the Courier and Inquirer.) It is said that the President is about to open on the office-holders who owe their appointments to the influence of Douglas. Unless that Senator repents and comes round to the sound views of the Executive, not a friend of his will remain in office two months from this date. The axe has fallen upon Mr. Price, Postmaster of Chicago, a very valuable place. Mr. Price was appointed last spring on the nomination of Mr. Douglas. His name will not be sent to the Senate. Mr. Harris is to go out of the Union, but remain State Printer. He has gone to Missouri, and to day it is understood that Mr. Hughes of Virginia, son-in-law of the Secretary of War, takes the tripod. He is bitterly hostile to the Northern Democracy in any shape, looking upon it with fear and disgust.

(Times Correspondence.) As the time for action on Kansas affairs approaches the President begins to be seriously doubtful of the result in Congress. The defection of the Pennsylvania Delegation is very threatening; the same may be said of the New York Delegation, six of whom are firm having decided to vote Lecompton through. The Iowa Delegation is a unit against it; and very little reliance, at a pinch, can be placed upon Illinois or Indiana. The President withholds from the Senate the nomination of Gov. Wright of Indiana, the present Minister to Prussia, some say because the Prussian Government objects to him, and others because his friends at home will not swallow Lecompton.

(Herald Correspondence.) The Senate Special Committee on French Spoliation decided at their last meeting in favor of reporting a bill which Mr. Crittenden is preparing. It will include all the reports heretofore made, together with the veto, &c. The mode by which the Committee proposes to pay said claims is to issue U. S. 5 per cent. stock. They limit the amount to five millions to be pro rata, provided they exceed that amount. (Tribune Correspondence.) The Committee on Territories will report to-morrow, in the Senate, in favor of the immediate admission of Minnesota, to which there will probably be no opposition; the matter has been satisfactorily arranged. Mr. Graham, Assistant Secretary of the Interior, has been sent to New York and Ohio to examine the

FROM YAKON.

witnesses for the investigating committee. It is determined that Gen. Scott shall go to California on the 21st of February, but not supposed to lead a new division of the army, or to organize a basis of operations there. This movement does not affect the plan of the campaign at all. The whole force in Kansas will move in the spring, whenever the grass is sufficient to sustain the animals, and heavy trains starting probably early in April, and there at the end of that month. Extensive ramifications of organized Mormonism have been discovered in Texas and California, embracing men holding responsible positions.

FROM WASHINGTON.—Washington Jan. 25.—(Tribune Correspondence.)—Mr. Stanton has just arrived from Kansas. He brings no later information. The same gentleman at Independence on the day of his departure, who had received a letter from the men from Calhoun, stating that the whole force had carried the Legislature. Mr. Stanton thinks the result depends entirely upon Calhoun in giving certificates, and if the Free State men are defeated, he cannot return to the territory without the sanction of his liege. Mr. Stanton represents the honest franchise movement, open and admitted. This people at Weston and along the river, admit to him that young men had gone over in black, and acted as often as they chose without opposition. He thinks Calhoun will come with the Lecompton Constitution. He says that slaveholders are moving out of Missouri, and the whole effect of the Kansas politics and administration will be to make Missouri a free State.

DISCHARGE OF ECKEL.—New York, Jan. 25.—In the Burdell murder case, John J. Eckel was finally discharged from his recognizance to-day, and an order nolle prosequi entered.

LATER FROM SALT LAKE CITY.—New York, Jan. 25.—The Times has dates from Great Salt Lake City to Dec. 10. The Mormons had completed their preparations for resistance to the troops, not intending to risk an open fight, but purposing to undertake a guerrilla warfare. The former intimations of this plan of operations are fully confirmed.

Echo Canon, a difficult pass near the city, had been strongly fortified, and was occupied on the 7th of December by a strong body of Mormon Rangers.

A permit from headquarters was required before parties leaving the city were permitted to pass.

The yield of the crops in Utah had been enormous, so that the Mormons will be well provisioned.

A number of Mormons are known to be in the camp of the Army, and accurate information of the movements of the troops was daily received at Salt Lake City. The Mormons are somewhat troubled by restless spirits, who insist upon immediate measures of open hostility, but are held in check by Brigham until the proper opportunity offers.

COUGHs, colds, soreness of the chest, and bronchial irritation, which are among the exciting causes that tend to produce Consumption in those that are predisposed, are all removed and effectually cured, in a very few days by that most remarkable discovery of the nineteenth century, Fouse's Pabulum Vitæ. See advertisement.

Are your lungs diseased, and would you be cured, do not allow yourself to be experimented upon, but try a remedy that has proved itself worthy of your confidence. We refer to Dr. Wistar's Balsam of Wild Cherry.

ANOTHER MISSING STEAMER.—The steamship Ariel, of the Vanderbilt line, is now in her twenty-sixth day from Southampton. This length of time being doubly sufficient for her to make the passage to New York, serious apprehensions are felt for her safety. She left Copenhagen on the 31st ult., having on board 96 passengers, the largest cargo of dry goods which has been shipped to this country for several months, the English, French and German mails, and \$5000 in specie. Her regular sailing day was the 30th ult., but her detention is alleged to have been in consequence of fogs which prevailed at Bremen and Havre. Severe gales have been reported by the recent arrivals. The Traveller says the Ariel, though a fast steamer, is not reputed to be strong.

REV. JUSTIN R. LOOMIS.—We learn that this gentleman, who was formerly for several years a teacher in Waterville College, first as Tutor, then as Professor of Natural Science, and for a few years past has occupied the chair of the same department in Lewisburg University, Pa., has recently been elected President of the latter institution in place of Rev. H. Malcom, D. D. resigned. We heartily congratulate our former teacher and friend, and also the young and flourishing University over which he is called to preside, upon his accession to this important position, which we doubt not he will occupy with distinguished honor to himself and benefit to the institution.

Thus have three of those who were a few years since associate Professors at Waterville, become the Presidents of different collegiate institutions, viz:—FRANK ANDERSON, of Rochester University, CHAS. L. LORIMER, of Waterville College, and LOOMIS, of Lewisburg University. Long may they flourish!—[Zion's Advocate.]

Mr. Thomas Small, of Bath, has a small farm, containing about 15 acres, three miles distant from the city, which he cultivates with a success that should be an encouragement to all other farmers, especially when it is known that Mr. Small has lost his left hand and all of his right but two fingers. He writes to the Rural Intelligencer as follows:—"I keep one yoke of oxen, two cows, and I have hay to sell every year. I think I cut last season 16 tons of hay. I raised 120 bushels of potatoes, 90 bushels good corn in the ear, 1100 pumpkins, 400 heads of cabbage, 54 bushels of beans, and 35 bushels of garden sauce. I hired help to the amount of \$30, and I worked out enough to come to \$70. My little place is called Wingenance. I paid \$1715 for my land (10 acres) in cash, and I wish I could purchase more at the same rate. But there is not for sale near me. I can make it well to pay \$100 per acre for land to farm on; other people may say what they please about it."

LUCKY STONE'S TAXES.—On Friday afternoon a constable of Orange, N. J., proceeded to the residence of Lucy Stone, to sell a portion of her property for taxes, (which she refused to pay.) The first article offered was a marble table, worth about \$12, which she started at \$6 and knocked down at \$7. Two steel plate knives were next offered—one of Gerrit Smith and the other of Gov. P. Chase, which were sold together for \$5. From these sales a sufficient sum was raised and a small balance was paid to Lucy. She told the Constable that "every year, when the law was changed the same thing would have to be done."

Dr. James Bates of Kendall's Mills is about to remove to Yarmouth, having received an invitation from the citizens of that town to occupy the field made vacant by the late Dr. May's resignation.

Dr. James Bates of Kendall's Mills is about to remove to Yarmouth, having received an invitation from the citizens of that town to occupy the field made vacant by the late Dr. May's resignation.

Dr. James Bates of Kendall's Mills is about to remove to Yarmouth, having received an invitation from the citizens of that town to occupy the field made vacant by the late Dr. May's resignation.

THE EASTERN MAIL. AN INDEPENDENT FAMILY NEWSPAPER. Published every Thursday by M. H. HARRIS and W. WING.

TERMS. If paid in advance, or within one month, \$1.50. Paid within six months, 1.75. Paid within the year, 2.00.

POST OFFICE NOTICE.—WATERVILLE. DEPARTMENT OF MAILS. Waterville Mail leaves at 10:30 A.M. Close at 10:20 A.M.

FACT, FUN, AND FANCY. A Good Match.—A writer in the Home Journal describes a couple who were not unequally yoked together.

Some of the domestic evils of drunkenness are less without windows, gardens without fences, fields without hedges, children without parents, and so on.

IT TAKES THE YANKEES.—Miss Moody, of Middlebury, Vt., makes a perfectly original suggestion in aid of the launch of the Leviathan.

A woman may have her fables, as well as the fool. In this difference between them, namely—the fables of the one are true, and the conceits of the other are world and conceited from himself.

Ob, Mr. Grubbles! exclaimed a young mother, shouldn't you like to have a family of rosy children about your knee?

A little daughter of Mr. Streeter, of Keene, died about two weeks after being choked by a kernel of corn, and afterwards the kernel was found lodged in the left lung, which was much irritated by the irritation of the substance.

Recently a gentleman residing in Harrington, found a turtle, bearing on its shell the year of 1814, which date is inscribed by Job Turner in that year, according to a statement of his son, who avers that he saw it when he was ten years old, and that he had seen it since the turtle's shell, and set the old veteran at liberty.

An exchange recommends the following as an infallible cure for beastly intoxication: Whenever a person is in a stupid and insensible state from the abuse of intoxicating drinks, lay him on his right side, elevate his left arm, pour cold water down his throat, before common sense can be emptied, the man will walk perfectly sober.

Some of the farmers in Michigan have been making maple sugar, this month, the sap flowing very freely. When some of his couriers endeavored to excite Philip the Great, he said, "I have a present for you, but I do not know what it is, but I can revenge myself, but it is a fine thing to have a revenge in one's power and not use it."

Rev. I. S. BALLOCH.—It is now understood that this gentleman will probably remain with his church, in compliance with their earnest desire. The loss of a joyous illness is always a painful thing, and like a child looking at a *Clossa* after he has washed his face.

Have a good hat; the secret of your looks lies with the beaver in Canadian brooks. But man and nature seem the shocking hat. Mount the new carter, let itself melt. Boots, gloves, may fall—the hat is always FELT.

It is stated that there are ten times as many newspapers printed in German language in the United States as there are in Germany. Rev. J. W. Hanson has sold out his interest in the paper, as one of the proprietors, to his former partner, Mr. Roman, but will still retain his connection as editor.

A youngster who had just risen to the dignity of a fat pair of boots, laid himself open, through misadventure, to a most painful ailment. After a moment's stand, I mean to take off my boots. "Why?" asked his mother. "Because I won't be whipped in them any more now."

The rumor that Fenimore had become a confirmed drunkard, is emphatically contradicted. The President publishes in the Union his proclamation, declaring that the agreement entered into with Denmark to discontinue the sound dues has gone into effect. By his convention the free and unincumbered navigation of American vessels through the sound and the belts is never secured.

SAD CALVALTY.—On the 17th inst., Mr. Elijah Young Lincolnville was cutting wood at his own door, when a little son about eight years of age suddenly placed his foot on the log and the axe came down chopping it off! The lad was carried into the house of his grandfather, Moses Young, Esq., when the appearance of the poor fellow so excited the grandmother, Mrs. Young, that she took to her bed and died the next morning.

William Bendleton, formerly of Camden, was arraigned before the Municipal Court in Rockland on Friday last, charged with the person of a girl of about 12 years of age. The evidence was such as to sustain a charge of assault with intent, &c., and the defendant was committed in default of \$1000 bail, to await his trial at the Supreme Judicial Court at Wiscasset.

A GOOD TEAR.—R. C. Withrop finished the U. S. Society, the following toast: "The farmers of the United States—may their policy and practice be such as we may never see America clothed in weeds."

AGRICULTURAL REPORT. Secretary Goodwin secured great credit, and done the farmers of Maine an inestimable favor, by his annual report. It was justly asserted by one of the members, that this volume is of more value than ten thousand dollars distributed by the Legislature for agricultural purposes. It could be widely distributed, and we advise every farmer to secure a copy if possible, and see it round for general personal till worn out.

We propose to make extracts as we have room for thanks are due to our neighbor Boothby, the vigilant Messenger of the Board, for an early copy.

A CALICO PARTY.—A new social institution—new at all events in this region—was inaugurated at Staples' Assembly Rooms, on Friday evening. It came off in the form of a grand soiree, given by Mr. and Mrs. A. Staples—at which the ladies were dressed exclusively in calico, or more properly speaking, worn dresses exclusively of that material.

The party was very large—embracing a *calico* of the city, with a good sprinkling of distinguished strangers. Dancing was among the amusements of the evening. Never before was beheld such a display of calico. Never before was the power of calico so signally illustrated. It was a proud sight—and a complete triumph for calico!

MAINE LEGISLATURE. Monday, Jan. 18.

SENATE.—On motion of Mr. Jones, Ordered, That the Committee on Reform School be directed to visit said school, at some time during the present session of the Legislature, and inquire into its management and discipline, and thoroughly investigate the management and condition of its finances, and report to the Legislature; and for the purpose of prosecuting such investigation, said committee shall have power to send for persons and papers.

Mr. Hobart presented the petition of Wm. H. Hemingway and 13 others, for an alteration of the constitution, so as to hold the annual State election on the same day with the election for the choice of Presidential and Vice Presidential electors. Also, petition of S. H. Talbot and 10 others of East Machias, for an insolvent law. Referred.

Mr. Woodbury called up from the table an order offered some days since, that all petitions for private legislation presented after the 10th of February next shall be referred to the next Legislature, which was amended by striking out 10th and inserting 15th, and then passed.

On motion of Mr. Goddard, Ordered, That the Committee on the Judiciary be directed to inquire into the justice and expediency of permitting persons charged with crimes to be sworn and testify on their trials.

HOUSE.—On motion of Mr. Tapley of Saco, Ordered, That the Committee on the Judiciary be directed to inquire and report whether the present laws on bail in criminal cases sufficient.

On motion of Mr. Tapley of Saco, Ordered, That the Committee on the Judiciary be directed to inquire and report whether the present forms of civil and criminal process admit of simplification and improvement, and to report such modifications thereof and of the proceedings in court, as they may deem expedient and proper.

Petitions Referred.—Of Willard Walker and others, of Bath, for a repeal of the law authorizing disclosures, under arrest on execution, without bonds, referred to Judiciary Committee; by Mr. Porter of Lowell, bill to abolish imprisonment for debt, laid on the table under the rule; by Mr. Drummond of Winslow, petition of Samuel Smiley for a law to prohibit the exhibition of travelling circuses, referred to Committee on Judiciary.

Wednesday, Jan. 20. HOUSE.—Petitions, &c. presented.—By Mr. Strickland of Bangor, petition of Amos M. Roberts and 100 other citizens of Bangor, that the Legislature will compel the Penobscot and Somerset and Kennebec Railroads to connect their trains at Kendall's Mills, referred to the Committee on Railroads, Ways, and Bridges; of Directors of Oxford Central Railroad Company for authority to connect their road with the Androscoggin and Kennebec Road, referred to the Committee on Railroads and Bridges;

Thursday, Jan. 21. HOUSE.—On motion of Mr. Hall, of Gorham, Ordered, That the use of this hall be granted to the members of Agriculture, on Friday evening, for the discussion of a question.

On motion of Mr. Cook of Durham, Ordered, That the members of the Board of Agriculture, during the present session, be admitted to the privilege of the State Library on the same condition as members of the Legislature.

Petitions and other papers presented.—By Mr. Weeks of Yansboro', petition of Laura F. Briggs, for change of name, referred to Committee on Change of Names; by Mr. Chick of Madrid, of Mary D. Chase and 146 ladies of Phillips, for a prohibitory liquor law, of Wm. Soule and 87 others, for same object, referred to the Committee on Liquor Law.

On motion of Mr. Ranney of Winslow, the Bill to abolish imprisonment for debt, laid on the table yesterday by Mr. Porter of Lowell, was taken from the table, read by the speaker, and then referred to the Committee on the Judiciary.

Friday, Jan. 22. HOUSE.—On motion of Mr. Sargent of Brookline, Ordered, That the Committee on the Judiciary be instructed to inquire into the expediency of so amending chapter 6, section 6, of the Revised Statutes, that widows whose real and personal estate does not exceed five hundred dollars, shall be exempt from taxation.

On motion of Mr. Pike of Calais, Ordered, That the Committee on Finance be instructed to inquire into the expediency of making provision for the payment of the State debt, that falls due on the first of March next.

On motion of Mr. Banks of Biddeford, Ordered, That the Committee on Mercantile Affairs and Insurance be directed to inquire what legislation, if any, is necessary to protect the people of this State, from irresponsible foreign Insurance Companies, and report by bill or otherwise.

On motion of Mr. Pettengill of Wayne, Ordered, That the Committee on Agriculture be instructed to inquire into the expediency of so amending the law, as that no funds shall be furnished by the State to Agricultural Societies for any purposes, except for the improvement in stock raising, in agricultural, and in the mechanic arts.

On motion of Mr. Boody of Brunswick, Ordered, That the Committee on Education be directed to inquire into the expediency of establishing one or more Normal schools for the training of teachers in the State, the expense of establishing and maintaining said schools to be defrayed out of the State tax on banks, to report by bill or otherwise.

On motion of Mr. Pike of Calais, Ordered, That the Committee on Finance be requested to inquire into the expediency of laying a State tax of \$200,000.

Petitions presented.—By Mr. Prantis of Bangor, petition of Rufus Dwinial for a law to prevent Banks from taxing more than six per cent interest, referred to Committee on Banks and Banking.

THE CASE OF W. S. TUCKERMAN.—The case of W. S. Tuckerman, for mail robbing, has been again postponed, by U. S. Commissioner Ingersoll, at New Haven. It is stated that the complaint filed against him contains about sixty counts, charging various mail robberies, upon which, in default of bail in \$20,000, he is still confined in New Haven Jail. The U. S. District Court for that district meets in February, when most probably the Grand Jury will find bills of indictment against him.

A CALICO PARTY.—A new social institution—new at all events in this region—was inaugurated at Staples' Assembly Rooms, on Friday evening. It came off in the form of a grand soiree, given by Mr. and Mrs. A. Staples—at which the ladies were dressed exclusively in calico, or more properly speaking, worn dresses exclusively of that material.

The party was very large—embracing a *calico* of the city, with a good sprinkling of distinguished strangers. Dancing was among the amusements of the evening. Never before was beheld such a display of calico. Never before was the power of calico so signally illustrated. It was a proud sight—and a complete triumph for calico!

THE POET'S SONG.

The rain had fallen, the poet arose, He passed by the town and out of the street; A light wind blew from the gates of the east, And waves of shadow went over his head. And he sat him down in a lonely place, And chanted a melody loud and sweet, That made the wild swan pass in her cloud, And the lark drop down at his feet.

The swallow stoop as he hunted the bee, The snake slept under a spray, The wild hawk stood with the down on his back, And stared with his foot on the prey, And the nightingale thought, 'I have sung many songs, But never a one so gay, For he sings of what the world will be, When the years have passed away.'

THE SLAVERY QUESTION AT THE SOUTH.—The New York Times, commenting on the speeches of Messrs. Blair and Thayer, says: 'The truth is, that the economical questions connected with the discussion of Slavery are but just beginning to be handled with seriousness and accuracy. The political leaders of the South, for the most part, neither know nor care one straw about the facts of the case. They have seized upon the popular theory of an Anti-Slavery crusade against Southern rights and Southern honors, and they are madly lashing up the Southern public to a state of mind which, if it supervened upon an individual, would be pretty sure to consign his property into the keeping of a Court of Chancery. Such a thing as a fair examination of the social and economical tendencies of the institution of slavery seems to have become impossible anywhere South of Mason and Dixon's Line.'

SUDDEN DEATH.—We learn that Mr. Asa Laughton of Norridgewock, was found dead in his bed on Sunday morning last. He retired about half past nine on Saturday night in his usual health.

ANOTHER.—Mrs. Holden of Moose River, aged about 93, was found dead in her bed on Wednesday morning last. [Skowhegan Clarion.]

SCENE BETWEEN A CHINESE PAINTER AND A YANKEE SEA CAPTAIN.—There is the Studio of a portrait painter, not probably a dangerous rival to Lamus, of Macao. There is loud talking in that studio. A Yankee is inspecting a portrait of himself, which has been painted at a contract price of some \$20.—The Yankee is a man about 40, with streaks of gray in his bushy hair and beard, with a slight defect in one eye, a large nose and pock-marked face. Yet, withal, thanks to its affluence of hair and an expression of jaunty determination and devil may care go-aheadness, he is a manly-looking fellow. He is looking ruefully, however, at this counterfeited presentment of himself which is to go to the girl of his heart at New York. It is a most laughing-moving caricature of all the salient points of his physiognomy. The Yankee swears that it is no more like him than hickory nuts are like thunder. The artist has produced a small looking glass, which he places beside the portrait, and, pointing to the gray hair and the squinting eye, and the pockmarks of the portrait, and then to the present originals from which they were copied, says triumphantly at each verification, 'Hag got? Hag got? Hag got? How can make handsome man's nose no handsome face?'

CHRISTIAN ZEAL.—Let us take heed we do not sometimes call that zeal for God and his Gospel, which is nothing else than our own stormy and tempestuous passion. True zeal is a sweet, heavenly, and gentle flame which maketh us active for God, but always within the sphere of love. It never calls fire from heaven to consume those that differ a little from us in their own apprehensions. It is like that kind of lightning which philosophers speak of, that melts the sword within, but singeth not the scabbard; it strives to save the soul, but hurteth not the body. If we keep the fire of zeal within the chimney, in its own proper place, it never doth any hurt; it only quickeneth, warmeth, and enliveneth us; but if we once let it break out, and catch hold of the thatch of our flesh, and kindle our corrupt nature, and set the house of our body on fire, it is no longer zeal, it is no heavenly fire, but a most destructive and devouring thing. True zeal is like the vital heat in us, that we live upon, which we never feel to be angry or troublesome; but though it greatly feed upon the radical oil within us, that sweet balsam of our natural moisture, yet it lives lovingly with it, and maintains that by which it is fed.

THE EFFECT OF TOBACCO ON HEALTH.—Hall's Journal of Health states, that white business, Huntington, the forger, was never seen without a cigar in his mouth, and was well. Since entering prison, smoking is prohibited, and in three months he has gained fifteen pounds in flesh, and good health in proportion.

MAKING A POINT PLAIN.—At the late North Western Sabbath School Convention, Chicago, an anecdote was told of an eminent minister, who having used the word 'summary' in an address to Sunday School children, corrected himself thus: 'I fear children, I have employed a term you will not readily comprehend. I allude to the term 'summary.' Children, it is synonymous with 'agnosis.'

A postmaster, puzzling out a very uncertain superstition to an Irish letter, innocently remarked to an intelligent son of Erin, who stood by, that the Irish brought a hard set of names to this country. 'That's a fact yer honor,' replied the Irishman; 'but they get harder ones after they arrive here.'

CHEAP.—The Albany Argus has introduced a new quotation into its market report. 'Hags doll at 14 7/8 to a 5 per hundred.' All sales at such prices must have been of an inferior article.

Prof. Hedrick, who was driven from North Carolina University for his support of Col. Fremont, has received the appointment of third clerk in Mayor Tremain's office, New York. He has been of late superintending a chemical laboratory in that city.

Norris M., son of Mr. Calvin Cleveland, of Bloomfield, aged 8 years, cut one of his fingers a few days since in a hay cutter. Two years ago, he cut the same finger and another one off, a little below the nail.

The Skowhegan Clarion states that Mr. Samuel McKenney, of that town, was considerably injured a few days since, in the logging swamp, by being run over by a sled.

NOTICES. We Advise All in want of BOOKS, SHOES, & NUMBERS, to call at NEWELL & DOW'S, directly opposite the P. O.

ACADEMY. MRS. HARRIS—Physician, located in Waterville, may be found at her residence on Main-st., opposite the Elm wood Hotel, ready to attend all who may desire her professional services. Refers to Dr. W. H. Correll, Dr. G. Rolfe, Professors to the Penna Medical School, Boston, and Dr. H. Mosely, Philadelphia.

All Right.—THE DRY GOODS have all the right articles at the right prices as now elsewhere. BRY & KIRKLAND, No. 1, Ticonic Row.

Where Shall I Go? Well, if you want a splendid suit of clothing, call at the new store. If you want perfect satisfaction, go to NEWELL & DOW'S, where you can obtain every article of clothing, and (except your boots) call and see the new store.

Marriages. In Bloomfield, 23rd inst., an infant son of Mr. Hiram Bingham, 6 months.

Deaths. In New York, Jan. 22, Miss Susan M. Will, aged 94. In New York, Jan. 22, Mrs. Elizabeth Will, wife of Henry W. Will, aged 75.
