Soakin' Science
By Lynn Brunelle '85 and Lee Marek

Turn on the water tap and get soaked with science! Soakin' Science is lots of good clean educational fun. Kids learn about atmospheric pressure, refraction, phase changes, siphons, vortexes, surface tension, buoyancy and more. The kit comes with a 48-page full-color book and the gear you need for these fun experiments. You supply the kids and the water! Ages 8-12.

Vietnam Era Revisited
Veterans of some of Colby's most turbulent years remember that time with pride and regret. Page 14
