Sources of Drinking Water and Agricultural Chemical Use in Maine

This map shows the location of aquifers and public water supply wells in Maine. The location of cultivated lands is shown in green, while the percentage of cropland in each county that is treated with chemical fertilizers is represented by the gray shading of the county.

Legend
- Aquifer
- Public Well
- Cultivated land

% Cropland fertilized
- < 20
- 20 - 34
- 35 - 49
- 50 - 64
- 65 - 80

This map was made using ESRI ArcGIS 9 software.
Universal Transverse Mercator Projection, Zone 19N
North American Datum 1983

All data are from the Maine Office of GIS, with the exception of the agricultural chemical data which was adapted from the USDA 2007 Agricultural Census.
