Transportation in the Downeast

Theo Papademetriou

This map displays airports, roads, and railroads in the Downeast region of Maine, which includes both Washington and Hancock counties. In addition, the region is highlighted by topographical features as well as lakes and rivers to further understand the placement of these transportation services.

Special thanks to Manny Gimmond for help gathering layers and technical expertise.

Data Sources:
Layers for landcover and elevation are from ESRI
Layers for airports, counties boundaries, lakes, railroads, and roads are from the Maine Office of GIS
