

Distribution of Bird Habitats on Maine's Conserved Lands

Mariel Ferragamo
Atlas of Maine
Environmental Studies Program
Colby College, 2018

This map was created using ESRI ArcGIS software and the Maine Office of GIS. The Conserved Lands, Inland Waterfowl, and Coastal Birds layers are from the Maine Office of GIS. The data includes Piping Plover/Least Tern Essential Habitat, Roseate Tern Essential Habitat, Seabird Nesting Islands, Shorebird Habitat, and Tidal Waterfowl/Wading Bird Habitat that were combined to become the Coastal Birds layer. This map is projected in NAD83 UTM Zone 19N.

- Coastal Bird Habitat (on Conserved Lands)
- General Coastal Bird Habitat
- Inland Waterfowl Habitat (on Conserved Lands)
- General Inland Waterfowl Habitat
- Conserved Lands
