Pattern for Lady's Dressing Sack or Negligee by Martha Dean—No. 1091

When women realize that their costumes reveal their character and social position, every sign of elegance, grace and neatness in their dress is lost. We have very few sufficiently fine or simple costumes that will suit the modern sensibility. We must have a type which will adapt itself to the modern taste, and which will not be a semblance of what is past, but a real one of its own. The style of Maude's best clothes, however, is an attempt to make the most of what they have, and to make the most of their taste, by using their products. And we should always be very careful of them every day of the week and of every occasion, the appearance of Maude's negligee, the quaint old novel and there stood the dress, the dress in its true sense has been made.

Cardinal Pizzardo has taken the position that a deal must be struck with Japan, but at some point in the discussions, he lost his nerve. The Polish government, too, is now on the verge of abandoning its policy of non-intervention, but it has yet to be seen if it can keep its promise to the reformed states. The conference at Ettorey. MATTER OF FIRE PROTECTION.

An Insurance Authority Discusses the Situation in Waterville.

The chairman of the special committee recently established to investigate the matter of house hydrants and to make recommendations was present in Waterville Friday afternoon when he delivered his report. (The report was not made public Friday and will be delivered to the city council Monday morning.)

The chairman said that the city is in a dangerous condition because of the lack of fire protection. In the event of a serious fire in Waterville, it would take at least two days to have the fire fighting force ready and the water would remain in the main for the duration.

In two days and will remain in the main for the duration.

In the opinion of the chairman, the city should have at least two hydrants on every street corner to provide quick and easy access to the water supply. In the event of a serious fire, the fire fighting force would be unable to cope with the situation without the use of hydrants.

It was recommended that the city council take immediate action to provide for the installation of hydrants at all street corners to ensure quick access to the water supply in case of a fire.

The chairman also recommended that the city council consider the purchase of fire fighting equipment to be used in conjunction with the hydrants. This would ensure that the fire fighting force would be able to respond quickly and effectively to any fire that may occur in Waterville.

In conclusion, the chairman emphasized the importance of providing for adequate fire protection in Waterville to prevent the loss of life and property in the event of a fire. The city council was urged to take immediate action to address this critical issue.
