Alpine Ski Areas in Maine

This map shows the location of alpine ski areas and elevation in Maine. The triangles show the location of these ski areas based on their addresses in the Ski Maine website (www.ski-maine.com). Their positions on the map were determined using data from the Maine Office of GIS. If exact locations could not be determined, triangles were placed at towns closest to the ski areas, also using data from the Maine Office of GIS. Data for elevation and road networks was obtained from the US Geological Survey National Map Viewer website (viewer.nationalmap.usgs.gov/viewer.htm).

Legend

Elevation (m)
- High : 1603
- Low : 0
