Acknowledgements: This map was made by Sarah Dunham, a student at Colby College in April 2005. Bedrock and county data were obtained from the Maine office of GIS at a 1:500,000 scale. Bedrock data were reclassified to reflect age of rocks. Fault data were obtained from GEOFDE, a USGS interactive map at a 1:5,000,000 scale. The fault layer was reprojected using NAD 83 UTM Zone 19 N and clipped to overlay bedrock and county data.
