1. Upon review of results of current investigation of SUBJECT, it was determined that an interview under oath, a polygraph and a psychiatric examination were necessary in order to proceed to a final determination in this case.

2. SUBJECT's history reveals strong evidence of a "persecution complex". On several occasions in the past, HE has made false accusations and allegations to higher authorities, when confronted with actions which HE considered to be detrimental to HIMSELF. It is, therefore, recommended that extreme care be taken while conducting the interview to preclude any possible embarrassment to the Army.

3. Request SUBJECT be interviewed under oath and polygraphed concerning the following:

   a. On 13 July 1943, at an Executive Board meeting of Chapter 25 of the Federation of Architects, Engineers, Chemists and Technicians (FAECT), a discussion was held concerning important contracts to be made among scientific personnel who were engaged in atomic research and other critical work. Among those listed was a Bernard PORTER, not further identified. FAECT originated in the Lenin School of Espionage in Moscow and was comprised of a great many highly trained scientists who were also members of the Communist Party. It was Communist dominated from top to bottom and was primarily interested in infiltrating and organizing personnel in the Radiation Laboratory, University of California. In 1943, SUBJECT was employed as a physicist on Manhattan Project, by the University of California, Berkeley, California.

      (1) Determine the following:

          (a) Is SUBJECT knowledgeable of FAECT?

          (b) Did HE ever hold membership or positions of responsibility in FAECT?

          (c) Was HE ever contacted by any member of FAECT?

          (d) Was HE ever approached to conduct espionage or to furnish any type of information by any individuals while employed on Manhattan Project?

          (e) Any other pertinent information concerning HIS period of employment on Manhattan Project.

   b. SUBJECT, on HIS PSQ, indicated HE performed technical work in the Western Pacific 1950-1954; the Scandinavian area and Soviet Union in 1961 and the Caribbean area in 1962. In order to ascertain if this falls under the purview of criteria cited in paragraph B, Section III, AR 380-14, determine the following:
4. The interview need not be limited to the questions above and should be expanded if information of interest develops.

5. Because of several indications of mental illness revealed by investigation, request that SUBJECT be interviewed to determine whether he is willing to undergo a psychiatric examination on a voluntary basis. Should SUBJECT signify his willingness to submit to such examination, request necessary arrangements be made for such examination at a Government facility. It is recommended that the investigative file be made available to the examining doctor for his use and information. The examining doctor should be informed that the purpose of the examination is to assist this Headquarters in determining the applicability of Criterion 18, Section IIIB, Appendix, AR 380-14. In preparing his report of examination, therefore, the examining doctor should state whether SUBJECT has a mental illness or condition, the nature of that illness and whether it is an illness which may cause significant defect in judgment or reliability with due regard to the transient or continuing effect of the illness and the medical findings in the case.

6. This is a SPECIAL TYPE INVESTIGATION.
