2004 Distribution of Brood Trout Stockings
For The State of Maine

Ted McDermott
ES 212
March 16, 2004

Brood stockings refers to fish that have been raised in a hatchery until full grown and then released into a natural body of water where it joins wild fish. Data for this project was collected from the Maine Department of Inland Fisheries and Wildlife in conjunction with MIDAS data for lakes and ponds of Maine courtesy of Dr. Whitney King.

Fish Species

- ▲ Brook Trout
- ▲ Brown Trout
- ▲ Landlocked Salmon
- ▲ Lake Trout
