digitalcommons.colby.edu/atlas_docs/

CEMA and Red Cross Stations

Cities (population)

- 10133 - 16822
- 16823 - 23324
- 23325 - 35690
- 35691 - 64249

Flood Zone Inside Special Hazard Area

Flood Zone Outside Special Hazard Area

Lakes and Rivers

This map illustrates the location of FEMA flood zones along the coast of Maine, with special emphasis on Acadia and the Greater Portland Area. The map also includes the proximity of these flood zones to Red Cross and County Emergency Management Agency Stations as well as larger cities, rivers, and lakes. All of the data for my project were sourced from the Maine Office of GIS. I used the Flood Insurance Q3 Data and divided it into two flood zone types based on whether they were considered inside or outside of the Special Flood Hazard Area. The map was projected in NAD83 UTM Zone 19N.
