

# Carcinogenic Releases of Toxics and Respiratory Cancer in Maine

The Toxics release Inventory (TRI) is a public database that contains information on toxic chemical releases and waste management. This map displays the locations and sizes of releases of carcinogenic toxics in the state of Maine in relation to the incidence of respiratory cancer per 100,000 people for each county of Maine.

Data Sources: Maine Office of GIS, Environmental Protection Agency- Toxics Release Inventory, and Maine Center for Disease Control
