This Newspaper is brought to you for free and open access by the Waterville Materials at Digital Commons @ Colby. It has been accepted for inclusion in The Eastern Mail (Waterville, Maine) by an authorized administrator of Digital Commons @ Colby.

BY MRS. CAROLINE SOULE.

"It will rite them to-day. They have mail Thursday, and if they do not receive it, they will have it on Saturday. And as there is always a church, they can get it Sunday. We must always make some allowance for country mail. But if they get it Sunday, there will be time enough Tuesday noon for a deal of writing, and I tell you, Mary, such a letter as you'll see in the center of mother's table."

"You have a sister since you were a boy, interrupted the pleasantly. "Oh, I am so glad that you're going. I shall make me a new check upon this very afternoon, for I mean to be in the kitchen or pantry all the time. You never talk of mother's visitals after this visit."

"There is a real old-fashioned dinner, and I hope it will taste to Harry as it used to, but he has turned and went again into the study to fill up the unoccupied space. There was a large plate of bread, which her daughter tho't must be some of that very bread which she had often heard her father speak of in such high terms, but it was certainly different from any bread she had ever seen, then there were pickles and apple sauce, and some fine cucumbers sliced in vinegar with onions, and stewed pears, and sage cheese, and doughnuts, and

...up, with both rich and pale, then sweetening of refined loaf sugar, and flavoring of vanilla or lemon, with the substantial looking ones the mother had prepared, with the crust of rye flour wet up with buttermilk, maple sugar for sweetening, and allspice for 'season-

ear me," and she sighed, "it isn't any use for me to bake one—he won't touch it. I wish I could make it," and she looked at Mary pleadingly.

A new thought flashed through Mary's mind

Trinker-buyers should be aware of these facts.—[N. Y. Life Illustrated.

an iron spine. Everybody thinks there is poetry in everybody's life but his own. If people only wrote about what they knew, and not what they imagined, what tons and tons of ash this world would have been spared from reading. — [Albany Journal]

respect which existed in this city no longer than one year ago, with that which exists now. And if they will, in memory, go back to times anterior to the existence of any prohibitory law, to times when the sale was licensed and consequently unchecked, they may perceive a still greater contrast. Candid opponents should look at the benefits, as well as at what are called the "oppressions" of the prohibitive system. If the same benefits could be obtained under any less stringent system, we should be willing to try it—but experience does not so indicate.—*Amherst Whig.*

**SAD ACCIDENT.**—On Wednesday last, Mr. William Berry, stage driver between Gorham and the White Mountains, lost his life at Hillman bridge, in the following manner: He was seated, with another person, upon a loaded baggage-wagon, and upon driving upon the bridge, which crossed the Saco at that place, the horse became unruly, and by a sudden start, threw his feet over the railing, which was broken by the violence of the shock. The horse and wagon, together with Mr. Berry, were precipitated into the water, the man who was riding by his side barely escaping. Mr. B. immediately rose to the surface, floated down the stream some distance, and then sunk, but as he made no effort to preserve himself, it is supposed he was struck, in the fall, by a stone which was upon the top of the load. Several persons were upon the bridge at the time, witnesses of the calamity, and one man threw himself into the water and endeavored to render assistance, but without avail. The body has not been recovered at our last advice. The body of the horse, with the fore wheels attached, came ashore some twenty rods below the bridge.

Mr. Berry was about 35 years of age, and leaves a wife but no children. He was beloved and respected in all the relations of life, and his sad death will be sincerely lamented.

**DR. CHARLES T. JACKSON** writes to the State of Maine concerning the State Geological Survey. He fully justifies the decision of Gov. Morrill, and hopes that the Committee which may have the matter in charge hereafter, will write him to consult with them, so that they might know what is required. If he could have his way, he says he could make the Report the best school book in our Academies and Colleges.

It is a curious fact that but three days before the Spanish outrage upon the steamer Falcon, so much blustered about, the American sloop-of-war Albany committed precisely the same outrage for some good reason, upon an American bark, whose captain ignorantly or obstinately refused to show his colors.—The Albany not only fired towards, but at the bark and compelled her to leave. On board her she was found to be an American vessel under command of an obstinate blockhead who made all this fuss to show his independence.

Col. Steptoe has declined the governorship of Utah, and Judge Kinney, chief justice has stated that he will accept the appointment. Col. Steptoe's command left Salt Lake City on the 6th of April for Rush Valley, from which campaign place they start for California in the beginning of May. Five of the Indians who murdered Capt. Gunnison and his party in 1853 had been tried at Salt Lake City, and given guilty of man-slaughter only. They were sent to jail for three years, but escaped therefrom by Mormon contrivance, it was supposed.

We have intelligence of fresh outrages in Kansas. A young lawyer named Phillips has been seized at Leavenworth by a party of Missourians, carried to Western Mo., his head shaved, his face blackened, then ridden on a rail through the town accompanied by hideous music, and sold by a negro. The mob was unable to make him promise to leave the territory and when he was released, his brother took him back to Leavenworth.

**A DOG STORY.**—We were touched by a simple statement of the loss of a boy and the fidelity of a dog in last week's Caledonian. The boy fell into the river in Barton, unseen by any one but a girl. A large dog, owned near by, heard the splash, ran to the spot and leaped into the stream. It was just dark and boy and dog disappeared before any help arrived at the spot. Next day the bodies of the two were taken from the water together, the dog grasping the boy's coat and vest collar in his mouth, and the arms of the boy clasped around the dog's body. So firmly were they united in the struggle of death, that it was with no little difficulty they were separated. The grasp of the boy around the dog was such as to prevent him from using his legs. Otherwise he would doubtless have rescued the boy.

**TO PREPARE ASPARAGUS.**—In the usual mode of cooking a great deal of the asparagus is wasted. It should be cut every day; and in doing this pass the knife two inches below the ground. The whole will be good if prepared as follows. Take each stalk separately, and with a knife strip off all the thick skin that covers it. This may be done as easily as you peel rhubarb for pies. All that remains will be a thick tender, and not only a large portion will be saved from waste; but most of it will be improved by this process.
